

Factor I: E1 dominant environmental variable

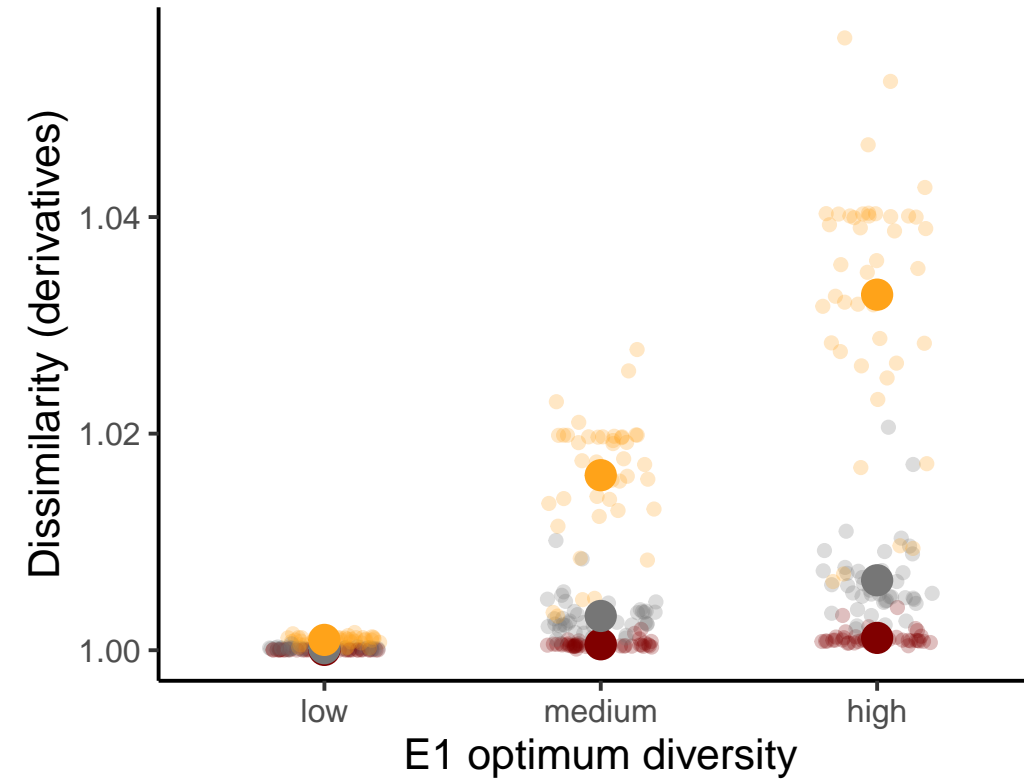

(a)

Factor II:
Only variation in E1
optimum diversity

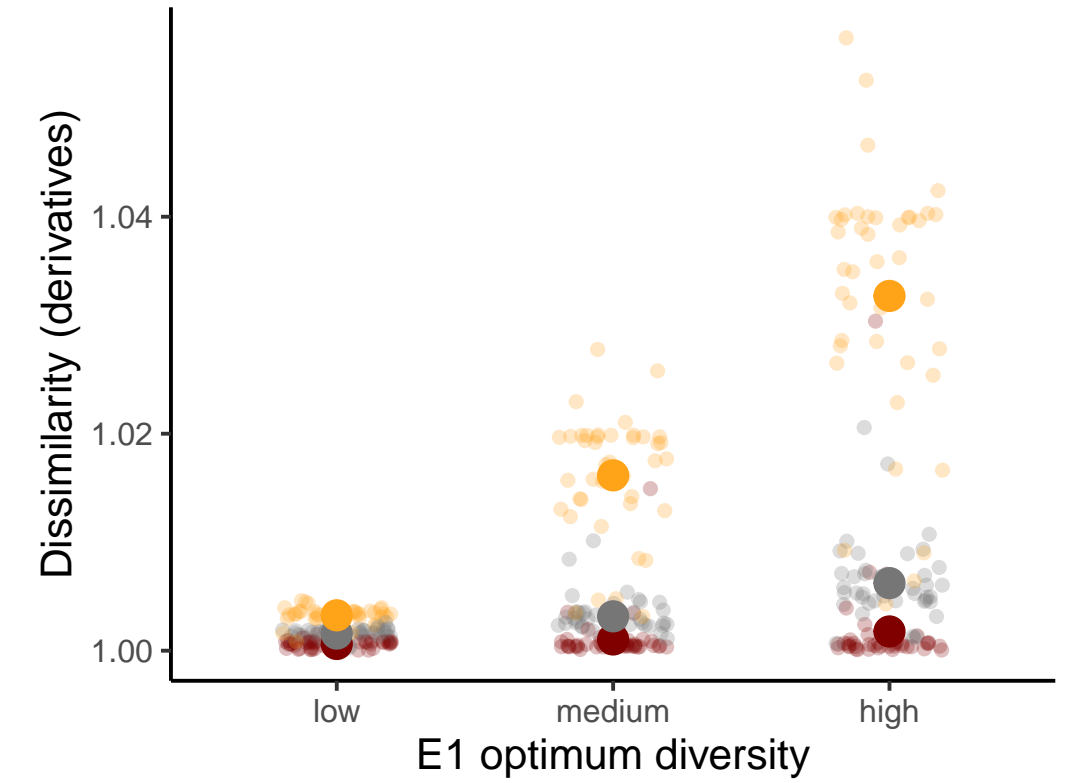

(b)

Factor II:
Variation in E1 and E2
optimum diversity – positive correlation

(c)

Factor II:
Variation in E1 and E2
optimum diversity – negative correlation

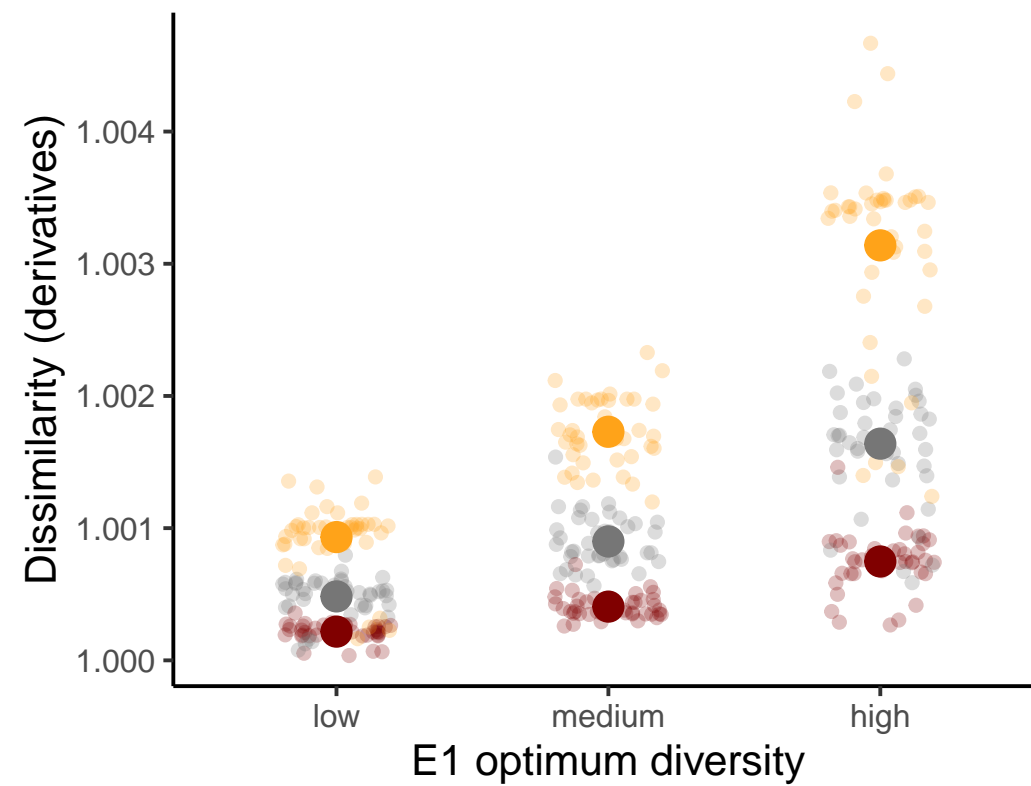

Factor III: E1 mean value ● low ● medium ● high

Factor I: Equal effect of E1 and E2

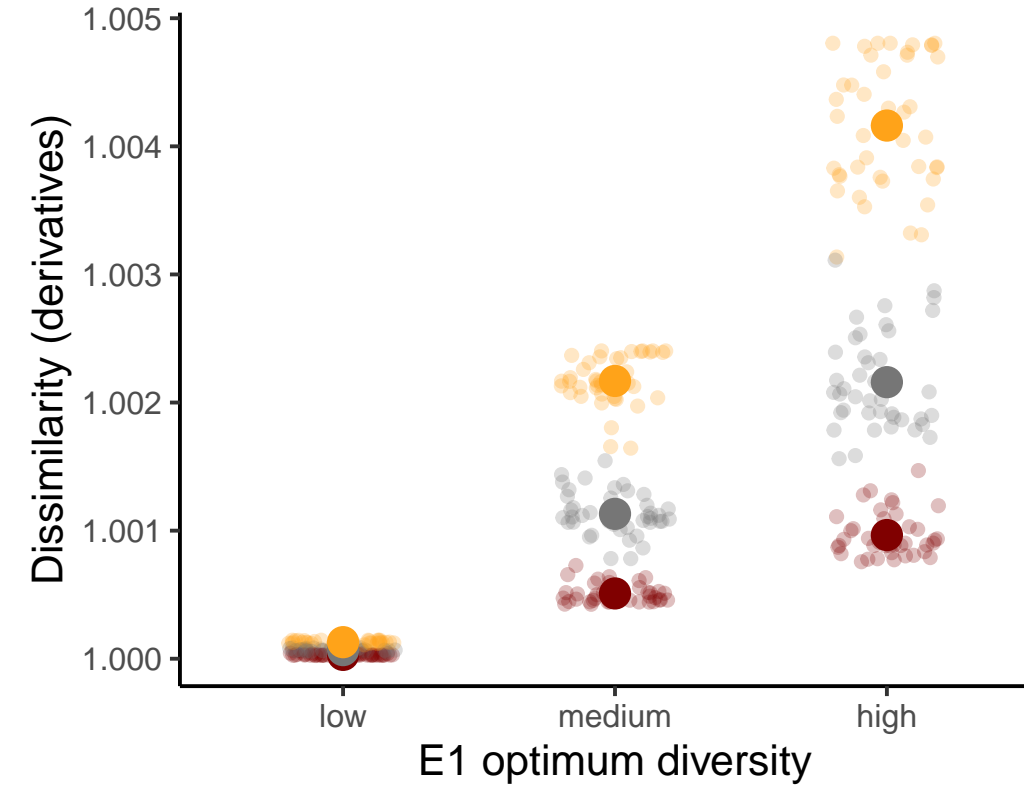

(d)

Factor II:
Only variation in E1
optimum diversity

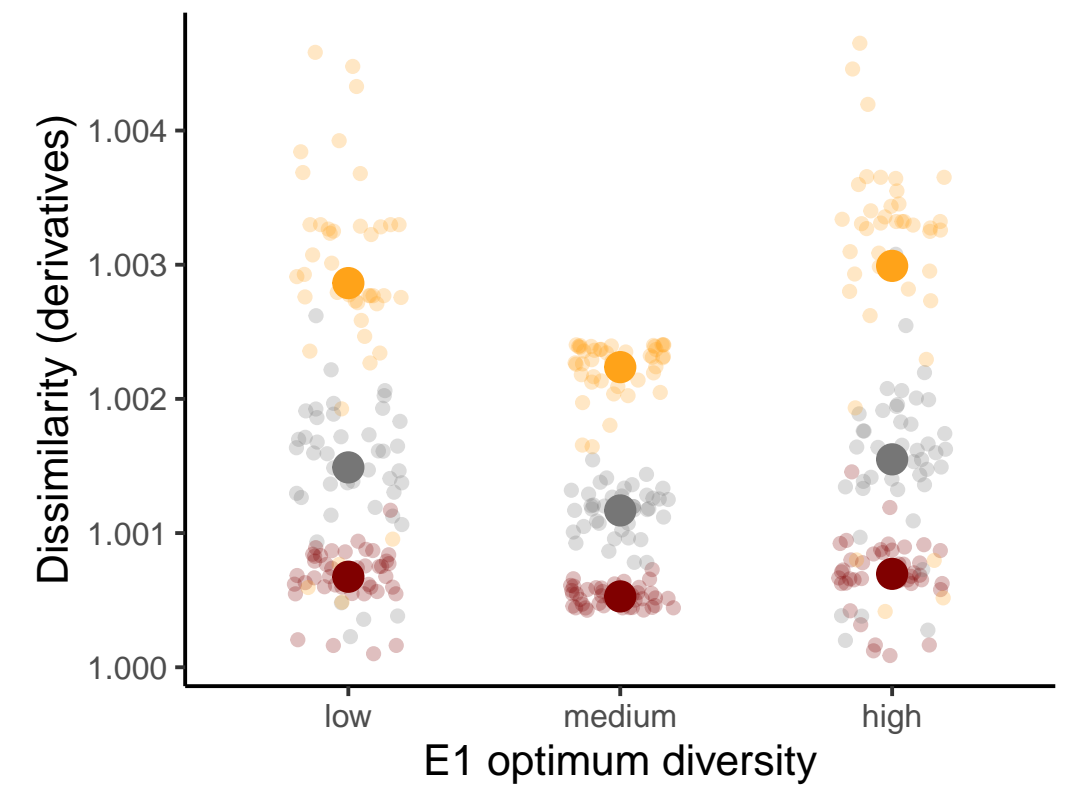

(e)

Factor II:
Variation in E1 and E2
optimum diversity – positive correlation

(f)

Factor II:
Variation in E1 and E2
optimum diversity – negative correlation

Factor III: E1 mean value ● low ● medium ● high
